

## Elite TT250D Die Cut Table Top Label Slitter Rewinder

The Elite TT250D Plain label die cut slitter rewriter was introduced into our Elite range to satisfy the demand for a low cost, compact and robust machine to produce and convert plain die cut labels.

The TT250D Die Cut Slitter Rewinder has been designed to accept most styles of rotary die, e.g. Focus, Nilpeter, Mark Andy, Gallus etc.

The TT250D is also fitted with BGM's unique Rotary Cartridge Slitting system. Also available is a Razor Cartridge system with quick release mechanism, which enables the cartridge to be removed without disturbing the web.

The TT250D bench top Die Cut Slitter Rewinder has a mechanical unwind brake and fixed splice table with air web clamp. The web is driven through the machine using a silicone covered driven nip roller. The rewind system for the waste rewind and product rewind are independently controlled, fitted with torque motors to ensure tension is maintained throughout the finished roll. Interchangeable air inflation rewind mandrels are fitted as standard, maintaining firm individual core grip for your customers valuable product.

### Standard Features

- Web width 265mm
- 76mm mechanical unwind mandrel
- 1000 linear metre unwind
- Single Rotary die station (Top loading)
- Speed 160 metres per minute
- Fixed splice table with single pneumatic web clamp
